

Modern Food Delivery UI/UX Design

Create a seamless food ordering experience with bold visuals, user-friendly navigation, and responsive design. This UI/UX concept balances appetizing food photography with clear CTAs and minimalistic cards to boost conversions and delight customers.

User Interface: Home & Browse Restaurants

Home Page

Features a welcoming hero image with top restaurants and personalized recommendations. The warm palette creates hunger appeal while modern typography ensures readability.

- Search bar with predictive text
- Featured restaurant cards with photos
- Prominent “Browse” CTA buttons

Browse Restaurants/Menu

Displays clean, card-based menus with filters for cuisine, dietary restrictions, and ratings. Users can quickly add items with bold “Add to Cart” buttons.

- Grid layout for easy scanning
- High-quality food photos
- Mobile-friendly touch targets

Restaurant Detail & Cart Interaction

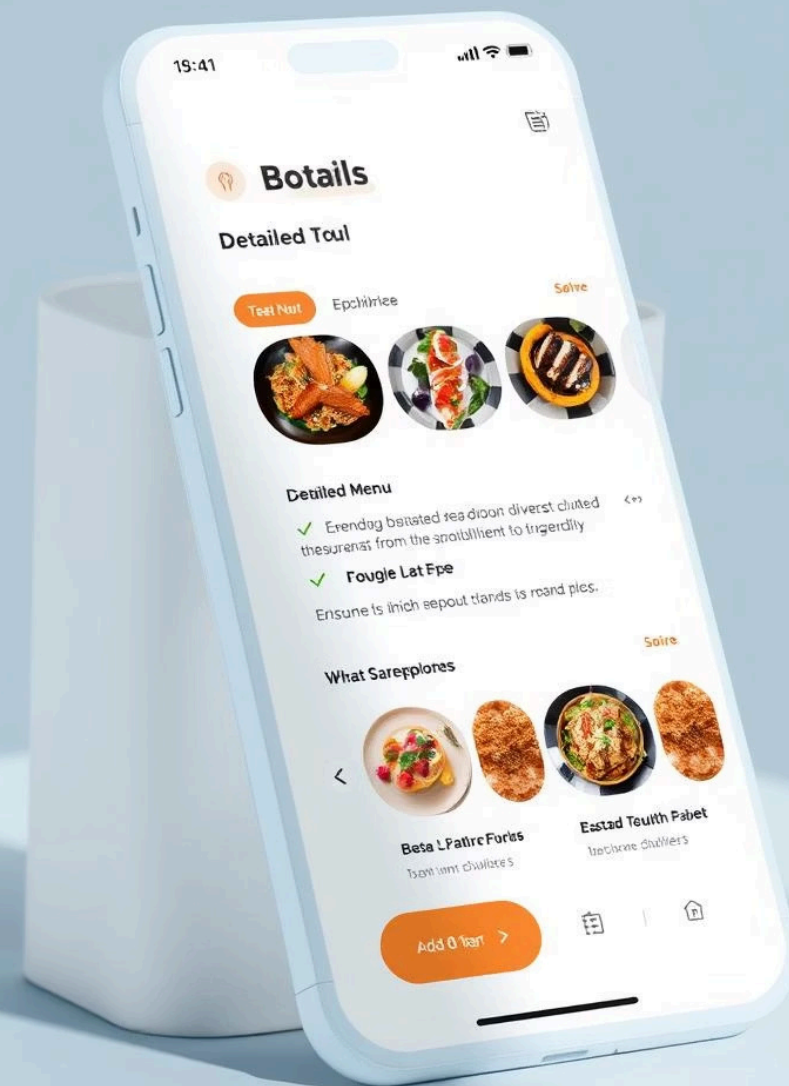

Restaurant Detail

Clean layout emphasizing food images, reviews, and menu categories. Sticky “Add to Cart” CTAs improve conversion flow.

Cart Page

Minimalistic card design with clear item breakdown, quantity controls, and total price summary. “Checkout” buttons stand out in bold colors.

Checkout

Leased sal retienes your pensend fur.

Checkout & Order Confirmation

Checkout Process

- User-friendly form with saved address options
- Multiple payment methods visual icons
- Progress indicators for checkout steps

Order Confirmation

- Clear confirmation message with order summary
- Estimated delivery time displayed
- CTAs to continue browsing or track order

Confirms on

User Account & Order Tracking
